MASTER OF SPECIALIZED VETERINARY MEDICINE, AVIAN MEDICINE
North Carolina State University College of Veterinary Medicine

POULTRY HEALTH MANAGEMENT; CERTIFICATE OF RESIDENCY (POULTRY)
North Carolina State University College of Veterinary Medicine

COMPLETED, ADVANCED STUDIES ON PROTOZOAN DISEASES
Obihiro University of Agriculture & Veterinary Medicine Research Center, Japan

VETERINARIAN, VETERINARY MEDICINE (DVM)
La Salle University College of Veterinary Medicine, Bogota

CAREER HIGHLIGHTS & PROFESSIONAL EXPERIENCE

- Worked in partnership with various allied industries to provide professional veterinary services—working closely in the field with major poultry producers to support and recommend solutions for good animal health and husbandry
- Developed and introduced experimental protocols regarding Boehringer-Ingelheim (BI) new poultry pharmaceutical products—supported strategic marketing through the development of informational literature related to poultry health and translated materials into Spanish to expand reach for global industry producers
- Facilitated training for poultry producers in processing plants utilizing the New Poultry Inspection System (NPIS), further leading internal educational training on various products and diseases impacting the poultry industry
- Managed assigned fiscal and physical resources, directed laboratory operations, and supervised technical staff throughout the hiring and training processes as well as leading diverse teams in the execution of assigned lab-related tasks
- Collaborated with industry professionals in acquiring and achieving the Maryland Department of Agriculture (MDA) Animal Health Laboratories International Standards Accreditation (ISO 17025)—successfully deploying all animal health regulatory, emergency diagnostic, and other service operations for the Lower Delmarva Region of Maryland
- Contributed to the successful design, planning, and implementation of a \$70M MDA laboratory building—leveraging experience and expertise to ensure requirements were met and facility capabilities aligned with industry needs
- Ran field and laboratory diagnostics and investigations into poultry health and disease prevention including supervising and conducting necropsies, comparing diagnostic methods for poultry enteritis, and applying techniques (serology, microbiology, and pathology) to prevent various erosive diseases

Oversaw all clinical service activities for the North Carolina State University Poultry Health Program and facilitated the instruction of Poultry Science students at Virginia Polytechnic Institute and State University

Served as a leading Veterinary Officer for the Colombian Agriculture Institute tasked with supervising diagnostic procedures, managing client interaction, and liaising with local and national veterinary and agricultural associations
