

My name is Cooper Stanley, and I am a first-year student at Texas A&M. At A&M, I serve as a Class of 2026 Student-Faculty Liaison as well as the Poultry Medicine Club's (SCAAAP) Vice-President. Following graduation, I hope to complete a poultry residency and work in either production medicine or technical service.

As an undergraduate, I worked at A&M's Poultry Science Research Center and completed internships with Sanderson Farms and Cal Maine Foods. I graduated from Texas A&M in 2016 with a BS in Poultry Science and took a position with Cal Maine Foods as a laying hen production supervisor. In 2018, I returned to A&M as the assistant manager of the Poultry Science Research Center where I managed the research feed mill, oversaw construction and renovation of facilities, and supported the various research trials and educational activities.
