Avian Diseases

Vol. 50, No. 3

September 2006

Table of Contents

Invited Minireview—

- The Relationship of Severe Acute Respiratory Syndrome Coronavirus with Avian and Other Coronaviruses. MARK W. JACKWOOD 315

Regular Articles—

- Increased Level of *Eimeria* Sensitivity to Diclazuril After Using a Live Coccidial Vaccine. G. F. MATHIS AND C. BROUSSARD 321
- Development and Evaluation of a DAS-ELISA for Rapid Detection of Avian Influenza Viruses. ANDING ZHANG, MEILIN JIN, FANGFANG LIU, XUEBO GUO, QIAOYUN HU, LI HAN, YADI TAN, AND HUANCHUN CHEN 325
- Characterization of Monoclonal Antibodies Against Fowl Adenovirus Serotype 1 (FAV1) Isolated from Gizzard Erosion. SATOSHI TAHARAGUCHI, HIROKO ITO, HIDEYUKI OHTA, AND KOZO TAKASE 331
- Susceptibility and Protection of Naïve and Vaccinated Racing Pigeons (*Columbia livia*) Against Exotic Newcastle Disease Virus from the California 2002–2003 Outbreak. DARRELL R. KAPCZYNSKI, MARK G. WISE, AND DANIEL J. KING .. 336
- Susceptibility of Various Parental Lines of Commercial White Leghorn Layers to Infection with a Naturally Occurring Recombinant Avian Leukosis Virus Containing Subgroup B Envelope and Subgroup J Long Terminal Repeat. JODY K. MAYS, ARUN R. PANDIRI, AND ALY M. FADLY 342

Pages Charges for Publication in Avian Diseases May Be Waived

Under special circumstances, page charges on articles published in *Avian Diseases* may be waived by the American Association of Avian Pathologists. Request for a waiver should be made by the author by providing a detailed justification in the cover letter that accompanies the submitted manuscript.

Avian Diseases Initiates Ahead of Print Publishing

Under this system, all papers will be available on the *Avian Diseases* website (www.aaap.info) as soon as they are accepted for publication—weeks or months before they appear in the journal and before they have been copyedited or typeset. Ahead of Print papers will be integrated into the journal website's search engine and will be as accessible as the printed articles. Abstracts for the Ahead of Print papers will be available to everyone; while full-length text will be available (in PDF format) only to subscribers. After final publication, the Ahead of Print versions of the papers will be removed from the active list.

We hope this new feature will benefit the readers by allowing rapid access to new research results. The authors should benefit by delivering their message without undue delay and receive credit in a timely manner for their contributions. Editor

About the cover

Jerry Raymond Beach, 1888–1951. A veterinarian and faculty member who conducted notable research on poultry diseases for 37 years at the University of California, Berkeley and Davis campuses, Dr. Beach earned distinction for disentangling the specific disease components of the “respiratory disease complex” in chickens. He authored chapters on infectious bronchitis, infectious laryngotracheitis, pneumoencephalitis (Newcastle disease), and infectious coryza in the first edition of *Diseases of Poultry* and trained students who contributed significantly to the poultry health field.
