About the cover

Featured on the cover is Dr. Glenn Snoeyenbos. He had a long and distinguished career as poultry disease diagnostician, educator, and scientist at the University of Massachusetts and, among many research contributions, he was internationally acclaimed for his research on competitive exclusion of *Salmonella* and other pathogenic bacteria in newly-hatched chicks. He was very active in the early years of the American Association of Avian Pathologists serving as the organization's second secretary/treasurer (1961–1970) and president (1971–1973). He also represented avian disease interests very capably in other organizations including the American Association of Veterinary Laboratory Diagnosticians (AAVLD) and the United States Animal Health Association. He was the recipient of the AAAP Special Service Award (1982) and the AAVLD E. P. Pope Award (1987). (Photo provided by the History Committee of the AAAP.)
