THE AMERICAN ASSOCIATION OF AVIAN PATHOLOGISTS

promotes scientific knowledge to enhance the health, well-being, and productivity of poultry to provide safe and abundant food for the world.

AAAP and PSA Meet Jointly in St. Louis, MO.

The American Association of Avian Pathologists and the Poultry Science Association combined their annual meetings for the first time this year at the AVMA Convention. The combined meeting offered unique educational opportunities for members of both organizations and the convenience of attending two meetings at once for those who are members of both organizations.

The vast majority (82%) of AAAP members who responded to the post meeting survey approved of the combined meeting. The following are some examples from the comments section of the survey:

"For those of us who have to attend both meetings this is a great time saver. Also, it seemed to open up networking opportunities during the week to a far greater extent than I have experienced previously."

"Being a poultry microbiologist, it was a perfect meeting for me. I got the best of both worlds."

There were comments not in favor of the combined meeting. All comments received were valuable for future planning. We thank those who took the time to provide constructive feedback.

The Scientific Program was held at the Americas Center Convention Complex in downtown St. Louis, just blocks away from the famous Gateway Arch. Many other meetings and events were held at the Hyatt Regency St. Louis at the Arch Hotel and the Renaissance Grand Hotel.

The Annual Meeting was ½ day longer this year than in years past, beginning at 7:30 am on Saturday July 16th and ending at 5:00 pm on Tuesday, July 19th. A joint AAAP/PSA symposium titled, "A Crystal Ball Look into the Future of..." was presented on Saturday, July 16th at 7:30 am. 674 titles were presented in the Scientific Program by the PSA and AAAP. There were 400 oral presentations and 274 posters. Of those, AAAP had 133 oral presentations and 49 posters.

The Lasher-Eckroade History/WPSA Lecture was given by Greg Mathis. It was titled, "The History of the Poultry Industry: Scientific Breakthroughs." Reed Rumsey Award winners Kabel Robbins and Ha-jung Roh presented their papers, "Genotypic and phenotypic comparison of field isolates *Enterococcus cecorum* in outbreaks of spondylitis" and "Interactions between multivalent attenuated live infectious bronchitis virus (IBV) vaccines in one-day-old chickens" respectively. The Richard B. Rimler award winner this year was Sachin Kumar. He presented his

Letter from the President

Patty Dunn

I am honored to serve as the AAAP president this year. Participation in the AAAP has brought a great deal of professional fulfillment to me, and I welcome the opportunity to give back. Along with the dedicated and talented members of the Board of Directors and management team, I plan to work hard to advance the missions of the AAAP.

I thank my immediate predecessor, Dr. Stewart Ritchie, for his leadership during his presidential term. He did a great job presiding over a very busy year for AAAP, including the highly successful, first-ever joint annual meeting of AAAP and PSA. His are big shoes (figuratively and literally) to fill.

Now in its 54th year, the AAAP has over 795 members from fifty countries. The diversity of nations, specialties, experiences and achievements of the membership continues to be great. This is true despite the current multinational economic hardships and societal changes that affect individuals, businesses, governments and organizations, including the AAAP. These are challenges that our association must deal with successfully to remain strong, relevant, and responsive in providing value to its members. With this in mind, the Board of Directors is engaging in a "where we want to be in 5 years" planning process to define and prioritize important goals going forward.

During my tenure as president, I hope to highlight 2 general themes:

The first is to support the initiatives to recruit and retain members in all phases of their educational and career paths. Included are those who may be undecided about careers in avian health and are just dipping their toes in to test the waters, and those who have been fully immersed for some time. The broad net covers undergraduate students through mid- and late career shifters. Careers are not created in a vacuum. The opportunities that exist within AAAP to network with supportive professionals and to directly access our premier scientific journal and other technical and scientific information generated by our members are unparalleled. The AAAP is a great organizational home in which to grow and adapt professionally.

The second is to focus efforts on the aspects of the "One Health" concept that are particularly applicable to poultry medicine. Several of the AAAP committees are tackling important issues of food safety, antimicrobial use and zoonotic diseases. Papers in Avian Diseases, presentations at our meetings and current educational materials provide high quality information crucial to understanding health and disease within and across species. Through education and advocacy, we have the opportunity to inform government and the public that AAAP is the "go - to" source for science-based, practical solutions to complex problems. Within our membership, we have the expertise to provide accurate information and perspective to show that there is a continuum from avian health to human health, rather than a dichotomy of one against the other.

I look forward to serving as your president this year, and hope that most of you are planning to attend the 2012 AAAP meeting at the beautiful California coastal venue of San Diego on August 4 -7 . Meanwhile, feel free to contact me or any other board member with comments and concerns, and visit our website for news and updates. Your continuing participation in AAAP, in whatever ways your time, talents and enthusiasm permit, is greatly appreciated.

Sincerely,

A handwritten signature in black ink, appearing to read "Patty Dunn". The signature is fluid and cursive, with a long, sweeping underline.

Patty Dunn,
President, AAAP

Letter from the Secretary-Treasurer

Chuck Hofacre

The AAAP had a fantastic annual meeting this year with our friends and colleagues in the Poultry Science Association in St. Louis. Based on the results of the post meeting survey those of you attending this first ever meeting of all the professionals in North America involved in the poultry industry was a great success with 82% saying: yes, meet with PSA again! I want to thank all of our sponsors who made this program a success and especially want to thank Novus for sponsoring the opening evening event and an evening at the St. Louis Zoo. The great success of this meeting was the combined AAAP-PSA Scientific Program and Rich Chin and John Smith need our thanks and congratulations for making it such a fantastic success. I also want to thank Bob Owen for the opening joint symposium "A Crystal Ball Look at..." that nearly 90% of you rated as excellent or outstanding.

While we are on the subject of Bob Owen, take a look on the AAAP website at the new biosecurity manual that Bob and his team completed this spring entitled "A Practical Guide for Managing Risk in Poultry Production." Every AAAP member should have at least 1 copy!

AAAP is in excellent financial health given the current global economic slowdown. Our fiscal year ended April 30, 2011 and we saw our net assets grow by \$26,130. Our major sources of income were dues and subscriptions (\$245,218), educational material sales (\$38,652) and royalties from Avian Diseases and Avian Diseases Digest (\$64,961).

One area we have been impacted by the down economy is in our decline in members from the previous years. To this end, the board is taking on added responsibility to personally contact members who have not renewed to see why and determine what AAAP can do to maintain our strong membership base. We also slipped some in the percentage of our veterinary members who are members of AVMA from 89% in 2010 to 86% in 2011. If you are a veterinarian, please not only renew your AAAP membership but also your AVMA membership. This allows AAAP to have representatives to the AVMA House of Delegates and gives us a voice within AVMA.

We are an organization of volunteers who work extremely hard for our organization. I want to thank everyone who volunteers your time to AAAP on AAAP committees, on AVMA committees and other allied organizations as AAAP representatives.

I also want to formally thank Bob and Janece for all they do to make our organization run smoothly.

Sincerely,

A handwritten signature in dark ink that reads "Chuck".

Chuck Hofacre
Secretary-Treasurer, AAAP

The American Association of Avian Pathologists Board of Directors approved a new mission statement after much input and collaboration from AAAP leadership and membership. It reads:

The AAAP promotes scientific knowledge to enhance the health, well-being, and productivity of poultry to provide safe and abundant food for the world.

AAAP and PSA Meet Jointly in St. Louis, MO. (cont.)

paper, "Reverse genetic studies of avian paramyxovirus type-3." The Schwartz Travel Scholarship winner, Daniel Wilson, presented a poster titled, "Occurrence of the cutaneous trematode *Collyriclum faba* in an American robin (*Turdus migratorius*) located in the Midwestern United States and Bret Rings received the Outstanding Field Case/Diagnostic Report Award for his presentation of, "The toxicity effects of feeding 1-alpha hydroxyl D3 to broiler breeding hens."

Many joint social events were held by the two organizations as well. There was an opening session and reception held on Saturday, July 16th, an ice cream social on Sunday, July 17th and a wine and cheese reception in the poster room at the convention center on Monday, July 18th. AAAP held its annual Awards Luncheon on Sunday, July 17th and the annual Business Meeting Monday, July 18th.

2012 AAAP Dues

Due Jan 1, 2012

If you wish to receive the Avian Diseases journal in print your AAAP dues will increase by \$30.00 in 2012. For those who want to receive Avian Diseases online only, the cost for 2012 dues will remain the same. 2012 dues costs are:

Online Only:	\$205.00
Print and online in the US:	\$255.00
Print and Online International	\$280.00

AAAP Membership Drive

AAAP membership has decreased in the last few years and we're doing something about it.

The AAAP Board of Directors is focused on retaining the 795 existing members.

The Membership Committee is focused on retaining new members.

You Can Help!
And Profit Too!

AAAP Membership Challenge

Members can reduce their own membership dues by encouraging individuals to become new members.

For each new member (not a AAAP Member in 2011) brought onboard by February 1, 2012, a \$50 credit will be applied to the AAAP member's account. Members can earn up to \$200 in credits. **These credits can be paid directly to the member, or members can choose to have their credits donated to the AAAP Foundation.** The referral can be tracked online when the new member registers. Simply ask the returning member or new member to list your name on their application.

If students or paying retired members want to participate, they will be allotted \$15 per person up to \$60.

AAAP Members must have their dues paid by Feb 1, 2012 to participate.

How can I find new members?

One way is to ask a lapsed member to rejoin AAAP. There are currently 311 lapsed members on our website. You can find out if a member is lapsed by going to the Directory on the website and searching your prospective recovered member's name. Their status will be listed as "Lapsed" in the profile detail if they have not paid 2011 (or previous) dues.

AAAP Foundation Poultry Scholarship Program

About the Scholarship

This fall students had their first opportunity to apply for a scholarship through the new AAAP Foundation Poultry Scholars program. Up to seven student scholarships will be given for the 2011-2012 academic year. This year we received 26 applications. Just as AAAP members represent a spectrum of poultry related careers, so the scholarship is broad in its applicant criteria. It is intended for both undergraduate and graduate students who are pursuing degrees for professional careers (DVM, MS or PhD) dealing with poultry health and well being or food safety. It will augment the successful AAAP Foundation Eskelund Preceptorship program and provide scholarship support to include veterinary medicine, and also poultry health research and food safety.

Why a Scholarship and Why Now?

News concerning animal well being and food safety is an almost a daily occurrence and exemplifies the public's growing awareness of the importance of these issues. At the same time there is a shrinking percentage of the population that understands farming and food production. Men and women who are well educated in the areas of poultry health, well being and food safety are needed. Consider also the ever rising costs of higher education and it is easy to make a case for scholarships to encourage young people to pursue these highly specialized fields.

You Can Help

The program depends on the financial support of AAAP members, as well as corporate and private donors. Please consider contributing to the AAAP Foundation Scholarship Program. Many AAAP members are making substantial contributions to the fund through a 5 year pledge plan:

\$50 for 5 years	\$250
\$100 for 5 years	\$500
\$200 for 5 years	\$1000
\$500 for 5 years	\$2500
\$1000 for 5 years	\$5000

Of course donations given in any amount at any time are welcome! If you would like to make a tax deductible donation, please send your check to the AAAP Business office or you can make your donation online at www.aaap.info/foundation.

Thank you for your support of the AAAP Foundation

54th Annual Report

American Association of Avian Pathologists, Inc.

For year ending April 30, 2011

July 2011

The American Association of Avian Pathologists, Inc. has continued to be a very successful non-profit 501©6 organization with our net assets growing by \$26,138 over the last fiscal year to \$555,103. The Board approved a \$10 increase in dues and subscriptions and it was this increase that has allowed the organization to remain profitable this past year. Our revenue from educational material declined significantly by \$16,000 this past fiscal year because we did not have a new edition of any of our books published. The major sources of income for AAAP, Inc., in FY2010-2011 were dues and subscriptions (\$245,218), educational material (\$38,652) and royalties on our journals (\$64,961).

Thank you to all the editors and authors of our educational material which is nearly 7% of our income this past fiscal year, slide sets C.D. (\$4,460-2011; \$2,907-2010), 6th ed. Avian Diseases manual (\$4,957-2011; \$11,977-2010), 5th ed. Isolation and Identification manual (\$5,759-2011; \$7,993-2010), 3rd ed. Avian Histopathology manual (\$10,202-2011; \$15,590-2010), 1st ed. Tumor Virus manual (\$2,510-2011; \$0.00-2010) and royalties from the 12th ed Diseases of Poultry (\$4,369-2011; \$8,907-2010).

The Board authorized the investment of \$150,000 with Marin Financial Associates in a Charles Schwab investment account this fiscal year. This decision was based upon comparison of the growth seen in a fairly conservative investment by the AAAP Foundation, Inc. returning 3.22% growth since 2004 vs. our C.D.'s returning less than 2%.

Our membership is still on the decline down 58 members from last year to 756 total. We had 64 new members, 5 new retired members and 157 members who did not renew their subscription. This resulted in a -\$9,423 impact to our total assets. Many of these members do renew but often it is after the end of our fiscal year (April 30).

The AAAP, Inc. is an organization of volunteers and it is great to report that our members are very active in not only AAAP committees but also as representatives of AAAP in many other organizations. Thank you everyone for serving your organization.

I especially want to thank Janece and Bob Bevans-Kerr for their tireless efforts to help AAAP continue in the right direction.

Respectfully submitted,

Charles L. Hofacre
Secretary-Treasurer, AAAP

AAAP Takes New Steps

After much input and consultation the AAAP Board of Directors approved a new mission statement for AAAP. This mission statement was accepted at the 2011 AAAP Business meeting in St. Louis. The new statement reads, *The American Association of Avian Pathologists promotes scientific knowledge to enhance the health, well-being, and productivity of poultry to provide safe and abundant food for the world.* We encourage all our members to utilize this mission statement which answers the question, "what good and for whom" for our association.

Debating at our annual meeting was the publication of **A Practical Guide for Managing Risk in Poultry Production**. To date over 300 copies have sold. This is the fastest selling book that AAAP has offered in many years. It is available as a hard copy print (275pgs) and as an eBook in formats compatible for Kindle, Nook and iPad (without chapter 7 on ventilation) See the next page for more information on how you can secure your copy.

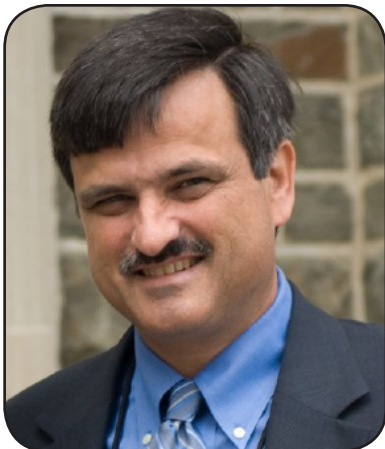

The **AAAP Foundation Poultry Scholarship Program** is off to a great start with 26 applicants applying for this year's awards. The Foundation intends to fund seven students this year and will complete the selection process by the end of this year. We encourage all members to consider a gift to the AAAP Foundation to support this program and all the awards programs available from the foundation. See page 9 for more information.

AAAP is in the process of migrating much of our content to a new content management provider. This new system will enable us to provide a shopping cart type experience when making purchases online. It will also enable delivery of items purchased online as downloadable content.

New this year is a **membership drive** that involves you our members. (i.e. Members who have paid dues for 2011) As an association we are able to fulfill our mission because of our membership and their participation. This

year we invite you to help us gain new members and encourage old members to rejoin if they have let their membership lapse. The BOD approved a reward to all members who help bring onboard new or returning members to AAAP. For each new member that registers by Feb. 1, 2012 you are eligible for a \$50 credit up to \$200. You can select to have this portion of your dues donated to the AAAP Foundation or you can have it refunded to you. For more details, please see page 5. We are currently at 795 members. Our goal for 2012 is to reach 900.
