

March 2003

WVPA/AAAP/AVMA Meeting July 19-23 in Denver, Colorado

The AAAP Board of Directors will meet all day on Thursday, July 17, Friday, July 18 and Saturday, July 19 and again on Wednesday morning, July 23 in the Grays Peak Room at the Hyatt Regency. All members are welcome to attend.

The AAAP Business Meeting will be on Tuesday, July 22 at 10:30 AM in the Convention Center.

There will be refreshments in the poster room each day at 7:30 AM.

Please come and enjoy!

Members wishing to obtain continuing education certificates for the meeting must see Dr. Eckroade at the meeting.

Don't forget to get your tickets for our very special events. A ticket order form is attached.

From the XIII WVPA Congress Organizing Committee

Members with foreign language skills needed

We need the help of AAAP members with foreign language skills to assist in making our international visitors welcome at this summer's WVPA/AAAP meeting. We really need people who can be on call for emergencies. If you would be willing to assist in this effort (you know, meet great people, do lots of international networking, and earn the undying gratitude of the meeting coordinators), please send the following to Kim Sprout (ksprout@vet.upenn.edu or fax 610-925-8106).

Name:

Languages spoken fluently:

AAAP member help needed

We need the help of AAAP members to answer the questions of our international (and domestic) visitors at help booths during this summer's WVPA/AAAP meeting. We need the assistance of all AAAP members to make our international guests feel welcome in Denver, and a few volunteers to man the help desk. If you can take a few hours to this, please contact to Kim Sprout (ksprout@vet.upenn.edu or fax 610-925-8106)

At least 2 volunteers with digital cameras are needed to take casual photos during the XIII Congress of the WVPA/AAAP/AVMA meeting in Denver. Please contact Dick Witter (witterR@msu.edu) if interested.

**USDA-ARS Elite Chicken Lines accepted for inclusion in the
National Registry of Genetically Unique Animal Populations.**

The National Animal Germplasm Program (NAGP) has approved a collection of 37 chicken lines maintained at the USDA-ARS Avian Disease and Oncology Laboratory (ADOL) in East Lansing, Michigan, for inclusion in the National Registry of Genetically Unique Animal Populations. The registry was developed to recognize important genetic resources that have had and continue to have a significant impact upon the research community and the industry at large. The populations selected are unique and have been widely utilized in the United States and throughout the world. The NAGP Poultry Species Committee initially nominated the lines; the nomination was later approved by the NAGP Policy Coordinating Committee that consists of the chairpersons from Dairy, Beef, Small Ruminant, Swine, Poultry and Aquaculture committees.

The ADOL lines, many of which were initiated in 1938, serve as a valuable animal resource. The use of these unique chicken lines has enabled scientists to more easily characterize agriculturally-important poultry traits, especially those involved in viral disease resistance, and apply the resulting information to control such economically important diseases. For example, genetic variability between lines led to the discovery of receptors for disease-causing viruses, which enabled the poultry industry to control or eradicate these pathogens. Other lines that differ in immunological responses helped not only to generate superior disease resistant chickens, but also allowed the judicious selection of appropriate vaccines. These results and many others have had a major impact on the poultry industry that translates into healthier animals, a safer food supply, and savings to the consumer. The biomedical community also benefited by the availability of these lines, as they were instrumental in the identification and understanding of many cancer genes, and the generation of chicken lines that have been and are being used to provide embryos for production of certain human vaccines. For more detail information on these lines please consult NAGP web site at www.ars-grin.gov/nag/.

WVPA/AAAP Special Events

We look forward to your participation in the XIII Congress of the World Veterinary Poultry Association. This Congress, integrated with the annual meetings of the American Association of Avian Pathologists and the American Veterinary Medical Association, is shaping up to be a world-class event. We hope that you will take advantage of the excellent scientific program, the social events and the pre- or post-Congress tours.

Welcome Reception

Please stop by for a pleasant evening of meeting new people and visiting with old friends. Soft music, a light meal and a cash bar will enhance the evening. A welcome from the organizers will highlight the events for the upcoming week and the organizing committee will be available to answer any questions. Although a ticket is not required for this event, we are attempting to estimate the number of guests who wish to attend. If you plan to join us, please fill in the number of guests attending on the ticket order form.

Gala Banquet

The Gala Banquet will be an event that you won't want to miss. A sit down meal and quiet music will be the perfect follow up to an excellent scientific program. After dinner, there will be music and dancing. Please order your tickets now. A ticket is required for this event.

Closing Event

The famous Denver Museum of Nature and Science has been reserved exclusively for our use as the venue for the WVPA closing event. Bus transportation from the Hyatt Regency Hotel will be provided. At the Museum, you will be treated to an interesting menu of educational exhibits and a light supper on the deck complete with spectacular views of the Rocky Mountains. A cash bar will be available. In addition, you may attend presentations at either of the two IMAX theaters (extra cost) located in the Museum. The Museum is one of the top attractions in Denver and is a perfect place to conclude our meeting and say farewell to your friends. You will not want to miss this special event.

AVMA Family Night

Join the AVMA, Bayer Animal Health and Hill's Pet Nutrition, Inc. in celebrating the history and beauty of the Old West and follow the dusty trail to the Red Rock Amphitheatre for AVMA Family Night. Fellow pioneers will converge among the towering red sandstone rocks and swap tales of life as a veterinarian on the American frontier. Don't forget to grab some grub at the chuck wagon while being on the lookout for those Wild West gunslingers, outlaws and bandits. Finally, kick up your heels to the tunes of country music sensation **Phil Vassar** under the starry Colorado sky.

Family Night tickets have gone quickly in previous years, and this year's event will be no exception. You are encouraged to purchase Family Night tickets when you register for the AVMA Annual Convention. Tickets are available on a first-come, first-served basis and may not be available on-site. Scheduled entertainment subject to change.

AAAP Awards Luncheon

This annual event recognizes recipients of the following AAAP awards: The P.P. Levine Award, Bayer-Snoeyenbos New Investigator Award, Special Service Award, Reed Rumsey Student Award, Richard B. Rimler Memorial Paper, L. Dwight Schwartz Travel Scholarship, and the C.A. Bottorff Award. Please order your tickets now.

Tickets for events must be pre-ordered so please order now. Tickets will not be available onsite.

WVPA/AAAP Special Event Ticket Order Form

Please indicate total number of tickets needed for each event.

Welcome Reception

Saturday, July 19, 6:30 pm-8:30 pm

_____ total tickets at no charge for a total of \$0

AAAP Awards Luncheon

Monday, July 21, Noon-2:00 pm

_____ tickets for a chicken lunch +

 382 West Street Road, Kennett Square, PA 19348
Fax: 610-925-8106
E-mail: AAAP@vet.upenn.edu

From the Epidemiology Committee... A Salary Survey

To: AAAP Membership

Dear Colleagues,

I am writing to request your participation in a compensation survey for our association. It has been over a decade since a comprehensive salary survey has been completed, and there are a number of good reasons to keep such information updated. There have been a few surveys more recently conducted for certain segments of our membership, but there is definite interest in looking at our group as a whole.

I want to encourage you to take the time to log on at the following link to participate: **www.cvm.msstate.edu/cvm/salariesurvey.tp3**. The survey itself should only take approximately 5 minutes to complete and only entails answering 11 questions, most of which are multiple choice. After you complete the survey, you should submit the information as indicated. You will need to answer all the questions to the best of your ability, even if a particular category doesn't fit your situation exactly. Once you start the survey, you will need to complete and submit it at the same time, as you will not be able to save the information for future completion. As such, please have an idea as to your salary/bonus figures prior to logging on. Finally, each individual should perform the survey only once for obvious reasons.

I also want to assure you of the confidentiality of the data which is submitted. The information is sent to a local server at Mississippi State University using the Test Pilot software program. Once there, the information is automatically tabulated and summarized to maintain anonymity. I can appreciate that most of us are sensitive to maintaining our compensation as a private matter.

Again, I urge your participation in this survey. The data is only as good as the amount of participation, and it will only be better as more members contribute. I would like to ask that you complete the survey by May 15, 2003, as we would like to have the data summarized in time to provide at the AVMA convention this summer. I want to thank you in advance for your help with this matter, and please feel free to contact me if you have any questions or comments.

Sincerely,
Timothy S. Cummings, DVM, MS, ACPV
Epidemiology Committee Chair, AAAP
Mississippi State University, Phone: 662-325-1113, Fax: 662-325-1031
Email: cummings@cvm.msstate.edu

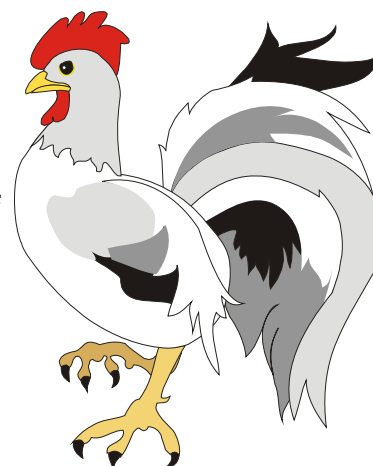

SPECIAL OFFER

ELEVENTH EDITION OF *DISEASES OF POULTRY*

The eleventh edition of *Diseases of Poultry*, edited by Y.M. Saif, with H. John Barnes, Aly Fadly, John Glisson, L.R. McDougald, and David Swayne will be available in early 2003.

AAAP members only may purchase **1 copy** of the new edition at the **very special price of \$101**. This is a substantial savings from the retail price of \$154.99. Members must place their order before July 1, 2003 to get this excellent price. All orders must be placed through the AAAP Business Office.

In addition to the print copy, each member may also purchase **1 copy** of the eleventh edition on CD-rom. This CD will not be available for several months.

ELEVENTH EDITION OF DISEASES OF POULTRY ORDER FORM

Please circle your choice. 1 book (\$101) **or** 1 CD (\$101) **or** 1 book and 1 CD (\$202)

Please add \$10.00 per book and \$5.00 per CD for orders being mailed outside the continental United States. **PREPAYMENT** by check (payable to AAAP), money order or credit card (Mastercard, Visa or American Express) is **required**.

A color atlas and text on
AVIAN INFLUENZA

A color atlas with description of the clinical, gross and microscopic findings observed during the 1999-2000 H7N1 Italian avian influenza epidemic, including diagnostic procedures, managing of outbreaks and current European legislation. Text and legends in English and Italian and legends in Spanish.

The atlas has 236 pages, 106 color images and a CD-Rom.

Order by e-mail: gigivero@tin.it. Also available at www.internetbookshop.it.

Parasites and Diseases of Wild Birds in Florida

Donald J. Forrester and Marilyn G. Spalding

Foreword by Tom H. Logan, Florida Fish and Wildlife Conservation Commission

"An outstanding resource for anyone interested in the biology of birds in Florida and nearby states . . . a truly exceptional work that will be used for decades."--William R. Davidson and M. Page Luttrell, Southeastern Cooperative Wildlife Disease Study, University of Georgia.

This distinctive reference is the first to present all available information on the various parasites, diseases, and other factors that cause sickness and death in Florida's wild birds, with an emphasis on distribution, prevalence, and significance. Organized by the host species of bird rather than by disease agent, each chapter is preceded by an introduction discussing the population and survival status of the bird or bird group. Appropriate reviews and bibliographies are noted along with references to hematology, serum chemistry, nutrition, and physiological topics. Each introduction is followed by sections on the various morbidity and mortality factors, disease agents, and conditions: starvation, human-related trauma, predation, electrocution, brood parasitism, inclement weather, chemical contaminants, neoplasia, anomalies, biotoxins, viruses, bacteria, fungi, protozoans, helminths, and arthropods. The distribution, prevalence, and intensity of each disease are given, followed by the significance of the disease to bird populations as well as to public health. In addition to providing a database of information needed for the management and conservation of Florida's unique avian community, this book will be an exceptional resource for wildlife biologists and ecologists, veterinary practitioners, animal health researchers, state and federal public health officials, and naturalists who by vocation or avocation are interested in wild birds.

Donald J. Forrester is professor of pathobiology at the University of Florida. He is the author of *Parasites and Diseases of Wild Mammals in Florida* (UPF, 1992) as well as 196 scientific publications, mainly on wildlife diseases.

Marilyn G. Spalding is associate scientist in pathobiology at the University of Florida. She is the author of 53 scientific publications on animal pathobiology.

March. 1024 pp. 7 X 10, 256 figures, 494 tables, 59 drawings, bibliographies, index.
ISBN 0-8130-2560-5 Cloth \$125.00

Poultry Health Management Schools - May 5-9, 2003. West Lafayette, Indiana. Schools include Broiler and Turkey Health Management School [May 5-6, 2003]; Food Safety and Waste Management Workshops [May 7, 2003]; and Layer Health Management School [May 8-9, 2003]. XVII Latin American Poultry Congress - To be held October 7-10, 2003 in Santa Cruz, Bolivia. The Organizing Committee is making the present call for the presentation of technical papers, both research and applications, in areas of interest to the poultry field. Research papers will be accepted for presentation in two ways: In a "poster" system, within an area especially designated for the exposition. Oral, during the scientific program. The Scientific Committee will determine which way will be used, taking into account the relationship of the papers with the subjects presented in the conference rooms. The papers accepted for either of the two manners of presentation mentioned above will appear in the Congress Notes and will have the right to participate in the selection and awards to the best paper in the corresponding area. The paper (s) should be presented for the consideration of the Organizing Committee, in Spanish before April 10, 2003. For more information, XVIII CONGRESO LATINOAMERICANO DE AVICULTURA – Bolivia, 2003, Av. Ovidio Barberí. Calle Antonio Barba # 120. Santa Cruz – Bolivia South America. Ref.: Trabajos de Investigación. **Employment
Opportunities**

**Veterinarian - Clinical Poultry Medicine
The Department of Avian Medicine
The University of Georgia**

The Department of Avian Medicine, College of Veterinary Medicine, The University of Georgia is seeking a veterinarian to fill a position in clinical poultry medicine. Requirements include the DVM or equivalent and Masters or PhD degree or board certification (or eligibility for examination) by the American College of Poultry Veterinarians. Responsibilities include clinical services to the poultry industry, major participation in instruction in the Master of Avian Medicine degree program, and/or clinical research. Salary and rank are dependent on qualifications and

training.

Interested persons should submit their curriculum vitae and names of 3 persons who may be contacted as references. Deadline for receipt of application is March 15, 2003. The search may be reopened/extended.

Direct inquiries and submit applications to: Dr. C. L. Hofacre, Department of Avian Medicine, College of Veterinary Medicine, The University of Georgia, Athens, GA 30602-4875. Phone: (706) 542-1904. Fax: (706) 542-5630. Email: chofacre@uga.edu.

The University of Georgia is an equal opportunity/affirmative action institution.

**Poultry Scientist—Biological Research and Development
Schering-Plough Animal Health**

COMPANY PROFILE:

As a Fortune 500 company, Schering-Plough is an industry leader renown for research, as well as a manufacturer and marketer of a broad range of pharmaceutical and health care products. Our Animal Health operation in Elkhorn, Nebraska targets the discovery of advanced antibacterial and antiviral vaccines and delivery systems. It is a leading provider of biologicals and pharmaceuticals for poultry, swine and cattle as well as companion animals including cats, dogs, and horses.

RESPONSIBILITIES:

The Poultry Scientist will support poultry research and be responsible for performing laboratory and animal work such as: Developing and performing assays, maintaining lab equipment, collecting clinical specimens, hatching birds, conducting clinical observations and inoculations. In addition, the Scientist will be involved in planning, data capture and analysis, protocol and report writing. This position will also work on departmental and interdepartmental teams.

REQUIREMENTS:

Bachelors and/or Masters degree in Biology, Microbiology, Virology, Immunology, or related field. Poultry animal husbandry experience required. Knowledge of Good Laboratory Practices are required.

CONTACT:

TERRY GALL, Schering-Plough Animal Health, 21401 West Center Road, Elkhorn, NE 68022.
PHONE: 402-298-6036 FAX: 402-298-6086 E-MAIL: terry.gall@spcorp.com

**TENURE TRACK FACULTY POSITION IN POULTRY MEDICINE
DEPARTMENT OF CLINICAL SCIENCES, FACULTY OF VETERINARY MEDICINE
UNIVERSITE DE MONTREAL**

POSITION: Assistant/Associate professor in poultry medicine

REQUIREMENTS:

- Candidates must have a DVM or equivalent degree and have a PhD or, must have a Master degree and be a diplomate of the American College of Poultry Veterinarians, or another College pertaining to the area of expertise.
 - Candidates must demonstrate necessary aptitudes in teaching and research activities as well as a relevant experience in poultry medicine.
 - Candidates must be able to communicate in French or be willing to learn it rapidly.
- The selected candidate will have to obtain licensure to practice in the Province of Quebec.

DUTIES:

The successful candidate will have :

- to participate in the teaching of poultry medicine to undergraduate and graduate students and in the continuing education program for veterinary practitioners,
- to contribute in research activities in poultry medicine and complement the poultry research program in place at the Faculty of Veterinary Medicine,
- and to develop and maintain clinical activities for teaching purposes.

SALARY: Salary will be commensurate with candidate's qualifications and experience

STARTING DATE: **July 1st 2003** or when the selected candidate is available.

APPLICATIONS: Applications will be considered through **April 15 2003**.

Candidates are invited to send a letter of application outlining their interests and statement of career goals, a current curriculum vitae including names, addresses, telephone/fax numbers/email of three referees to :

Dr. Andre Vrins, Chairman, Department of Clinical Sciences, Faculty of Veterinary Medicine, Universite de Montreal, P.O. Box 5000, Saint. Hyacinthe (Quebec), J2S 7C6. Phone: (450) 773-8521 - ext. 8289. Fax: (450) 778-8102. Email: vrinsa@medvet.umontreal.ca. Web site: <http://www.medvet.umontreal.ca/scliniques/default.htm>

The University of Montreal is an equal opportunity/affirmative action employer. In accordance with Canadian immigration regulations, priority will be given to Canadian citizens and permanent residents. Qualified women are encouraged to apply.

**Assistant Professor (Veterinary Science/Biosecurity)
Department of Animal Science, Food & Nutrition
Southern Illinois University Carbondale**

Veterinarian with the ability to be licensed in the state of Illinois and at least three years of research experience. The individual should have a strong background in microbiology, immunology and or biochemistry with research interest and expertise in the area of animal biosecurity and or bioterrorism. Preference given to candidates with MS or PhD degree. Candidate should have a familiarity with animal health regulations. The position is a tenure-track, nine-month faculty position (70% research, 25% teaching, and 5% service) at the rank of assistant professor. It is expected that the candidate will develop a strong externally funded research program in animal biosecurity and or bioterrorism. Candidate will participate in collaborative research and service activities for the livestock industry and Veterinary clientele in Illinois. Research interactions with faculty in the College of Agricultural Sciences, School of Medicine and College of Science is strongly encouraged. Applicant will participate in the departmental undergraduate and graduate teaching curriculum, recruit and supervise graduate students and advise undergraduate students. Applicant must submit a letter of application including a statement of research interests, a resume of education and professional experience, official transcripts, and request three letters of reference be sent to: Dr. Trish Welch, Department of Animal Science, Food & Nutrition, Southern Illinois University, Carbondale, IL 62901-4417. Telephone (618) 453-2329, Fax (618) 453-5231, E-mail welch1@siu.edu. SIUC is an AA/EOE
